EVALUATION OF CERTAIN FOOD ADDITIVES: SIXTY-NINTH REPORT OF THE JOINT FAO/WHO EXPERT COMMITTEE ON FOOD ADDITIVES

[DOWNLOAD](#)

World Health Organization, Switzerland, 2010. CD-ROM. Book Condition: New. 239 x 157 mm. Language: English . Brand New. This report represents the conclusions of a Joint FAO/WHO Expert Committee convened to evaluate the safety of various food additives, including flavoring agents, with a view to recommending acceptable daily intakes (ADIs) and to preparing specifications for identity and purity. The first part of the report contains a general discussion of the principles governing the toxicological evaluation and assessment of intake of food additives (in particular, flavoring agents). A summary follows of the Committee s evaluations of technical, toxicological and intake data for certain food additives (asparaginase from *Aspergillus niger* expressed in *A. niger*, calcium lignosulfonate (40 65), ethyl lauroyl arginate, paprika extract, phospholipase C expressed in *Pichia pastoris*, phytosterols, phytostanols and their esters, polydimethylsiloxane, steviol glycosides and sulfites [assessment of dietary exposure] and 10 groups of related flavoring agents. Specifications for the following food additives were revised: canthaxanthin; carob bean gum and carob bean gum (clarified); chlorophyllin copper complexes, sodium and potassium salts; Fast Green FCF; guar gum and guar gum (clarified); iron oxides; isomalt; monomagnesium phosphate; Patent Blue V; Sunset Yellow FCF; and trisodium diphosphate. Re-evaluation of flavoring agents for which estimated intake was based on anticipated poundage data was carried out for 2-isopropyl-N,2,3-trimethylbutyramide (No. 1595) and L-monomenthyl glutarate (No. 1414). Annexed to the report are tables summarizing the Committee s recommendations for intakes and toxicological evaluations of the food additives considered.
