Excerpt: .by making the perpendicular b equal to c ; hence a is the distance required. (4) Bring the plane (Fig. 177), vertically projecting the line which joins the two points, parallel to V by rabatment around any vertical, preferably that passing through (a, a) . This point remains fixed, and the point (b, b) assumes the position $(b,)$ by making the perpendicular b' equal to c ; hence a' is the distance required. 189. PROBLEM.--Upon a given line to measure a given distance from either extremity. Let (a, a) be the extremity from which the measurement is to be made (Figs. 178, 179), and (b, b) any other point of the given line. Fig. 178,5 Fig. 179. Bring the line by any of the preceding four methods parallel to either...

Reviews

It is just one of the best ebooks. I was able to comprehend everything out of this composed PDF. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Ocie Hintz**

This sort of PDF is every little thing and made me seek forward and a lot more. This is certainly for all who state that there was not a worth reading through. I found out this book from my dad and I recommended this publication to discover.
